

GROUP CAPABILITY STATEMENT

ATB Morton / CIA Precast & Steel / Advanciv
Redicrete / Redisand / Hunter Galvanizing / ArmorGalv

Founded in 1981, the ATB Morton Group is a leading family-owned Australian construction and industrial services business.

The Group has a strong history of delivering quality goods and services for over 40 years.

The vertical integration enables the Group to efficiently and cost-effectively work together to deliver for our customers.

1980's

- 3 brothers commence odd jobs on weekends and after hours
- Focus on automotive and truck repair, engineering and construction and civil works

1990's

- The business experienced significant growth
- Business strategy became focused on the construction of industrial buildings
- Emergence of some supporting business divisions:
 - Precast Panel Manufacturing, CIA
 - Hot Dip Galvanizing Business & Facility, Hunter Galvanizing
- Entered property development

2000's

- Additional business growth:
 - Premixed Concrete Business & constructed 3 Batching Plants
 - 2nd Galvanizing Plant
- Property portfolio growth

2010's

- Additional business growth:
 - Sand Quarry Business, Redisand
 - Civil Precast Business, Advanciv

2020's

- Additional business growth:
 - Expansion of Advanciv, commissioning of Dry Cast Machine
 - Concrete batching plants, Branxton, Dungog and Somersby
 - ArmorGalv, Thermal Zinc Diffusion

CAPABILITIES

Construction & Project Management

Steel Processing & Fabrication

Construction Materials & Products

- Sand Quarry
- Premixed Concrete

Protective Coating Services

- Hot Dip Galvanizing
- Thermal Zinc Diffusion
- Blast & Paint

Precast Concrete Products

- Civil Concrete Products Manufacture
- Precast Concrete Panel Manufacture

Property Management

ATB MORTON OFFERS COST EFFECTIVE AND EFFICIENT SOLUTIONS FOR COMMERCIAL AND INDUSTRIAL CONSTRUCTION NEEDS.

With a focus on delivering custom designed and constructed projects through our design, planning and project management teams, ATB Morton is well equipped to deliver Design and Construction, Land and Build and Turnkey Lease services.

Our group capabilities allow for full control of critical supply chains within our construction projects. This reduces risk for our clients and increases project quality and delivery, creating a stress free approach.

Alongside our external capabilities, ATB Morton consists of several behind the scenes divisions which keep construction projects moving smoothly. Transport, maintenance, mechanical work, electrical services, design and drafting and HSE; the team at ATB Morton present a diverse skill set to complete your project to the highest standards.

REDICRETE SUPPLIES QUALITY PREMIXED CONCRETE TO NEWCASTLE, PORT STEPHENS, LAKE MACQUARIE, THE HUNTER VALLEY AND CENTRAL COAST REGIONS OF NEW SOUTH WALES.

Our batching plants are located at Cameron Park, Tomago, Berkeley Vale, Branxton, Dungog and Somersby. Each plant produces high quality products to suit your requirements; whether it be everyday concrete, decorative concrete or our more sustainable option, Greencrete™.

We have a large fleet of agitators and trucks of varying sizes, which are proudly driven by experienced, customer focused and professional drivers. We are continually improving the efficiency and effectiveness of our fleet to optimise our service to meet customer needs.

REDISAND IS A SUPPLIER OF BULK SAND PRODUCTS SPECIALISING IN WASHED AND BROWN SAND.

We provide a range of bulk sand supplies at competitive prices for a range of industries with the ability to service customers throughout Newcastle, the Hunter region, Port Stephens, Lake Macquarie, Central Coast and Sydney and its surrounds.

Our double washing process eliminates and removes residual salt and sediments resulting in a high quality, premium washed sand.

Our facilities provide the ability to deliver high quality volume with minimal impact to the surrounding environment, with regular vegetation rehabilitation rounds in effect to rejuvenate the ecosystem.

CIA PRECAST & STEEL MANUFACTURE HIGH QUALITY PRECAST CONCRETE AND STEEL PRODUCTS.

Our **precast concrete** offering can be customised to your unique requirements. With the capacity to deliver various products in our dedicated manufacturing facility.

Our **steel division** operates in one of the largest facilities in Australia at 10,000m² under roof and 16,000m² of concrete hardstand. Our facility contains a Voortmann steel processing machine alongside our fully integrated shot blasting chamber.

We have a skilled and experienced team of **Installers** to ensure your project is delivered to the highest quality and on time.

We own and operate a 55T mobile crane and 20T Franna and a fleet of trucks with extensive supplier links to source additional lifting equipment as required to deliver on your project.

ADVANCIV HAS AN EXTENSIVE HIGH QUALITY PRODUCT RANGE ALONGSIDE CUSTOM PRODUCT DESIGN AND MANUFACTURING TO SUIT SITE SPECIFIC NEEDS.

Advanciv designs, manufactures and supplies civil precast concrete solutions with both a wet and dry cast product range.

Our current standard range includes; Box Culverts, Headwalls, Kerb Entry Units, Sewer Access Systems, Stormwater Pits and Wheelstops.

We have the capabilities and resources to produce custom precast concrete products and solutions to suit any site requirements. Whether it's a modification to our existing product range or a brand new product, our team will carefully review your requirements to achieve the best results for you, your team and your project.

DURABLE PROTECTIVE COATING FOR STRUCTURAL STEEL COMPONENTS.

Hot dip galvanizing provides a durable, industrial strength zinc coating for a wide range of industries including: heavy engineering and material handling, mining equipment and infrastructure, water treatment and sewerage, structural buildings and projects, food refrigeration and production, highway and road hardware, agricultural and irrigation equipment, domestic construction, rural and domestic fencing, transportation, sport and recreation.

We have a long history of delivering high-quality hot dip galvanized protective coatings across various sectors within NSW and interstate.

A SUSTAINABLE CORROSION PROTECTION CHOICE.

Thermal diffusion galvanizing provides a high quality, strong corrosion resistance with maximum accuracy. This process is best used for items requiring a uniform thickness, such as threaded parts or small parts.

ArmorGalv® is applied by tumbling parts with a unique zinc powder in a drum that is very slowly rotated inside an oven at temperatures between 350°C to 450°C. The coating penetrates the steels' surface to create a uniform protective coating.

This is the only process of its kind within Australia and is a cost effective and environmentally friendly protective coating solution.

FROM CONCEPT TO COMPLETION

THE ATB MORTON GROUP PROVIDES TOTAL PROJECT CONTROL.

FROM DESIGN AND APPROVALS, THROUGH TO PROJECT MANAGEMENT. YOUR PROJECT SUCCESS WILL BE DELIVERED BY OUR UNIFIED BUILDING PRODUCT DIVISIONS.

1 ATB MORTON

- Turnkey building design & engineering
- Town planning & project approvals
- Project management
- Specialist site management & supervision
- Civil works, stormwater, concreting & erection field teams
- Plant and equipment installations
- Electrical upgrades

2 CIA PRECAST & STEEL

- Precast concrete panels
- Workshop detailing
- Structural steel
- Steel surface treatment
- Steel and precast panel installation

3 ADVANCIV

- Manufacture and supply of precast civil products: pits, headwalls, box culverts and sewer access chamber system.

4 REDICRETE

- Ready mixed concrete
- Mass concrete retaining blocks

5 REDISAND

- Backfilling for trenching
- Sand for concrete mixes

6 HUNTER GALVANIZING

- Galvanized frame & components

7 ARMORGALV

- Protective coating on bars, bolts, couplers, nuts, pins, plates, posts, washers, clips, anchor heads, clevises.
